

Meeting Minutes

04/18/12

This meeting between Alex Jacoby and Luke Mader was called to order Wednesday, April 18 at 4:00 p.m. The purpose of this meeting was to:

- Use ESPN's free API to retrieve sports-statistics for use in Stat-Tracker.
 - This turned out to be impossible, as we would have to be an official partner of ESPN, and it wouldn't be free. We then made the decision to parse one of any number of freely available RSS feeds for stats.
- Code the basic classes, and the tests to ensure this classes work correctly.

Meeting was adjourned at 5:00 p.m., with the intention that Luke would draft these meeting minutes.

04/20/12

This meeting between Alex Jacoby and Luke Mader was called to order Friday, April 20 at 4:00 p.m. The purpose of this meeting was to:

- Find/develop a way to parse RSS feeds for sports statistics to use in Project Stat-Tracker.
- Develop a testing suite class to envelop our previously written tests for basic classes, as per instruction from Sriram Mohan at our last Intermediate Status Report (ISR) meeting.
- Revise the Stat-Tracker Project Plan to reflect necessary changes that were made during this design period.
- Write tests to be demonstrated during next week's ISR meeting with Sriram Mohan. These tests are designed to determine if we are receiving correct data from parsing RSS feeds, and whether our classes are handling non-parameter data correctly.

Meeting was adjourned at 5:00 p.m., with the intention that Luke would finish making changes to the Project Plan and draft these meeting minutes.
